WHAT IS LOPP?

Gabelli Funds has long been committed to a belief that the pursuit of profits and the support of our planet and its people can be self-reinforcing. The launch of Love Our Planet & People reflects this mandate in seeking to invest in companies committed to sustainable practices such as renewable energy, reduction or recycling of long-lived water conservation wastes and clean mobility.

INVESTMENT STRATEGY

The Fund seeks to provide a high level of total return by investing substantially all, and in any case no less than 80%, of its assets in U.S. exchange-listed common and preferred stocks of companies that meet the Fund's guidelines for social responsibility at the time of investment.

LOYALTY PROGRAM

In an effort to encourage investment, the Adviser has contractually agreed to waive the Fund's management fee of 0.90% on the first \$100 million in net assets until at least April 30, 2025. We are privileged to absorb these costs to underscore our emphasis on the environment.

ETF TAX ADVANTAGES

An ETF is a fund traded on a stock exchange. In 2019, the SEC approved an ETF structure called ActiveShares. This structure allows us to offer our strategies in a vehicle that combines the attributes of Mutual Funds and ETFs, including potentially greater tax efficiency.

About Gabelli Love Our Planet & People ETF

Gabelli Love Our Planet & People ETF is a diversified, open-end management investment company whose primary investment objective is to seek capital appreciation. Under normal market conditions the Fund will invest at least 80% of its assets in U.S. exchange-listed common and preferred stocks of companies that meet the Fund's guidelines for social responsibility at the time of investment. Your investment in the Fund is not guaranteed and you could lose some or all of the amount you invested. The Fund is managed by Gabelli Funds, LLC, a subsidiary of GAMCO Investors, Inc. (OTCQX: GAMI).

These ETFs are different from traditional ETFs. Traditional ETFs tell the public what assets they hold each day. These ETFs do not. This may create additional risks for your investment. For example:

- *You may have to pay more money to trade the ETFs' shares. These ETFs will provide less information to traders, who tend to charge more for trades when they have less information.*
- *The price you pay to buy ETF shares on an exchange may not match the value of the ETF's portfolio. The same is true when you sell shares. These price differences may be greater for these ETFs compared to other ETFs because it provides less information to traders.*
- *These additional risks may be even greater in bad or uncertain market conditions. The differences between these ETFs and other ETFs may also have advantages. By keeping certain information about ETFs secret, these ETFs may face less risk that other traders can predict or copy its investment strategy. This may improve the ETF's performance. If other traders are able to copy or predict the ETF's investment strategy however, this may hurt the ETF's performance. For additional information regarding the unique attributes and risks of the ETF, see the ActiveShares prospectus/registration statement.*

You should consider the ETF's investment objectives, risks, charges and expenses carefully before you invest.
