GAMCO GLOBAL GOLD, NATURAL RESOURCES & INCOME TRUST

INVESTMENT OBJECTIVE

The GAMCO Global Gold, Natural Resources & Income Trust is a non-diversified, closed-end management investment company. The Fund's investment objective is to provide a high level of current income. The Fund's secondary investment objective is to seek capital appreciation consistent with the Fund's strategy and primary objective. Under normal market conditions, the Fund will attempt to achieve its objectives by investing 80% of its assets in equity securities of companies principally engaged in the gold and natural resource industries, and by writing covered call options on the underlying equity securities.

TOP SECTORS OF PORTFOLIO

The GAMCO Global Gold, Natural Resources & Income Trust is an income fund. The Fund intends to generate current income from short term gains primarily through its strategy of writing (selling) covered call options on the equity securities in its portfolio. Because of its primary strategy, the Fund forgoes the opportunity to participate fully in the appreciation of the underlying equity security above the exercise price of the option. It also is subject to the risk of depreciation of the underlying equity security in excess of the premium received.

Leverage Risk. The use of leverage, which can be described as exposure to changes in price at a ratio greater than the amount of equity invested, through the issuance of preferred shares, magnifies both the favorable and unfavorable effects of price movements in the investments made by the Fund. The Fund's use of leverage in its investment operations subjects it to risk of loss.

Industry Concentration Risks. The Fund's investments will be concentrated in each of the gold industry and in the natural resources industries. Because the Fund is concentrated in these industries, it may present more risks than if it were broadly diversified over numerous industries and sectors of the economy. A downturn in the gold or natural resources industries would have a larger impact on the Fund than on an investment company that does not concentrate in such industries.

Covered Call and Other Option Transaction Risks. There are several risks associated with writing covered calls and entering into other types of option transactions. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, resulting in a given transaction not achieving its objectives. In addition, a decision as to whether, when, and how to use covered call options involves the exercise of skill and judgment, and even a well conceived transaction may be unsuccessful because of market behavior or unexpected events. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the exercise price of the call option, but has retained the risk of loss should the price of the underlying security decline.

(a) Performance returns for periods of less than one year are not annualized. Returns represent past performance and do not guarantee future results. Investment returns and the principal value of an investment will fluctuate. The Fund's use of leverage may magnify the volatility of net asset value changes versus funds that do not employ leverage. When shares are sold, they may be worth more or less than their original cost. Current performance may be lower or higher than the performance data presented. Visit www.gabelli.com for performance information as of the most recent month end. The CBOE S&P 500 Buy/Write Index is an unmanaged benchmark index designed to reflect the return on a portfolio that consists of a long position in the stocks in the S&P 500 Index and a short position in a S&P 500 (SPX) call option. The Bloomberg Government/Credit Bond Index is a market value weighted index that tracks the performance of fixed rate, publicly placed, dollar denominated obligations. The Energy Select Sector Index is an unmanaged indicator of stock market performance of large U.S. companies involved in the development or production of energy products. The Philadelphia Gold & Silver Index is an unmanaged indicator of stock market performance of large North American gold and silver companies. Dividends and interest income are considered reinvested. You cannot invest directly in an index.

(b) Total returns and average annual returns reflect changes in the NAV per share and reinvestment of distributions at NAV on the ex-dividend date and are net of expenses. Since inception return is based on an initial NAV of \$19.06.

(c) Total returns and average annual returns reflect changes in closing market values on the NYSE American and reinvestment of distributions. Since inception return is based on an initial offering price of \$20.00.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund before investing.

Information regarding the Fund's distribution policy and the most recent quarterly report, which contains a more extensive list of holdings, is available by calling 800-GABELLI (800-422-3554). Distribution rate is not representative of dividend yield or the total return of the Fund and has historically included a return of capital. After the end of the calendar year, the Fund will send individual shareholders with taxable accounts a Form 1099-DIV that will tell you how to report the year's distribution for federal income tax purposes.
